

Warning and Advisory

The information contained herein is designed as a guide to help understand, become familiar with and create an awareness of common practices in the hose and hose assembly field. Every manufacturer of hose and fittings has strict guidelines and procedures that must be followed. These manufacturer instructions supersede any and all advice given at www.hosetraining.com Consult your equipment manual, manufacturers specifications handbook and all guidelines for your particular hose, fitting, adapter or accessory that you are using. Never attempt to assemble a hose without proper knowledge and test equipment. Always have a trained, certified hose shop create your assembly for assurance that your hose or assembly is made correctly.
